

Flexible SMD-Production Line for small to midsize Volumes

Xortec OY, a leading EMS manufacturer in Finland has invested in a new SMD-Production Line. The production can be scaled flexibly from prototypes and small series up to mass production. The services of Xortec cover the entire life cycle of electronic products, the optimization of the production, assembly, testing and maintenance of the components.

Based on an over 20 year experience, Xortec manufactures for a wide range of customers in the areas of cameras, biological safety cabinets, GPS repeaters, remote controls, public transportation systems and many other industries and applications.

The main important points for choosing SMTHOUSE were the competitive pricing of the machines in combination with the technical features of the line and also the possibility to rent the SMD-Line instead of buying it.

«The cost effective solution from SMTHOUSE in combination with the unique rental model helped us to become more competitive and win more orders»

Seppo Koskensilta – Managing Director of Xortec OY

ABOUT SMTHOUSE

...

SMT House offers complete solutions for electronic manufacturing from low leading suppliers for low volumes with high mix, up to very high volume production throughout Europe.

...

Additionally, specialized financing solutions tailored to electronic manufacturing equipment offers unique long term rental possibilities with technology guarantee upgrades and service costs included.

Customers can benefit of fixed cost structures and cost savings and can make sure that their productions are always based on the latest technologies.

The installed line consists of two modules of Dual Beam, versatile Pick and Place Systems from Mirae, an inline SMD Stencil Printer as well as Inline Convection Reflow Oven. Programming is easy, fast and was learned in a very short time. The provided installation and training support as well as the technical skill of SMTH engineers helped Xortec to get system into the production within a short time.

According to Seppo Koskensilta – Managing director of Xortec OY has the installed SMD-Line solution improved the quality and the output of their production immediately and helped to separate themselves from their competitors.
